New York Patient Notices

TeleDirectMD | Effective October 27, 2026

These notices apply to patients who are physically located in New York State during their visit. They supplement our general Legal Notices and the New York section of our State Telehealth Consent Disclosures.

Your Physician and Practice

New York visits are provided by Parth Bhavsar Medicine PLLC, doing business as TeleDirectMD. Your physician is Parth Bhavsar, MD, board-certified in family medicine and licensed in New York (license no. 345804). You must be physically located in New York for the entire visit.

Health Plans, Hospital Affiliations, and Your Cost Estimate

New York Public Health Law § 24 requires physicians to tell patients which health plans they participate in and which hospitals they are affiliated with, and to give a written estimate when they are out of network.

- **Health plans:** TeleDirectMD participates with Aetna, Blue Cross Blue Shield, and UnitedHealthcare in certain other states. For New York visits, Parth Bhavsar Medicine PLLC is not a participating provider with any health plan, including Medicaid and Medicare, and does not bill insurance.
- **Hospital affiliations:** TeleDirectMD video visits are not provided in or through any hospital. Information about your physician's hospital affiliations is available on request at contact@teledirectmd.com.
- **Your written estimate:** the fee for a New York video visit is a flat $79, paid with your intake form. There are no other charges from TeleDirectMD for the visit.
- **Other providers:** if your physician orders lab work, you will be given the name, practice name, mailing address, and phone number of the lab at the time of the order. Lab fees are billed by the lab, not by TeleDirectMD. You can ask the lab which health plans it accepts before you go.

Paying With a Credit Card

New York General Business Law § 519-a requires us to tell you about the risks of paying for medical services with a credit card. If you pay with a credit card, the charge becomes credit card debt, not medical debt. By paying with a credit card, you give up state and federal protections that apply to medical debt, including:

- limits on wage garnishment and property liens
- the ban on reporting medical debt to credit bureaus
- limits on interest rates

You will be asked to acknowledge this notice on your intake form before you pay.

HIV and Hepatitis C Testing

New York law requires physicians providing primary care to offer an HIV test to patients 13 and older (Public Health Law § 2781-a) and a hepatitis C screening test to adults (Public Health Law § 2171). Your intake form includes both offers. Testing is voluntary, and saying no does not affect your care. If you choose testing, your physician will send a lab order and the lab bills its fee separately.

Your Medical Records

Under New York Public Health Law § 18, you may inspect and get copies of your medical records. Paper copies cost no more than 75 cents per page, any fee may not exceed our costs, and you cannot be denied access only because you are unable to pay. To request records, see our Medical Records Notice.

Prescriptions

New York requires prescriptions to be sent to the pharmacy electronically (Public Health Law § 281). Any prescription from your visit is sent electronically to the New York pharmacy you choose. TeleDirectMD does not prescribe controlled substances.

Your Rights and How to File a Complaint

The New York State Office of Professional Medical Conduct (OPMC) investigates complaints about physicians. For information about your rights and how to report professional misconduct, visit the OPMC website at https://www.health.ny.gov/professionals/doctors/conduct/.

You can also contact us first at contact@teledirectmd.com or (678) 956-1855. Filing a complaint will not affect your care.

Emergencies

TeleDirectMD is not for emergencies. Call 911 or go to the nearest emergency department. For a mental health crisis, call or text 988.
